VISOLOGIX CORPORATION AND POWERCONN TECNOLOGIA LTDA SIGN AN OEM LICENSE AGREEMENT FOR BRAZILIAN MARKET.

Houston, TX, January 23, 2023: VisioLogix Corporation, headquartered in Houston, Texas, announces that Powerconn Tecnologia LTDA (Powerconn) has signed a multiyear OEM co-branding agreement with VisioLogix to license VisioLogix digital evidence management software (DEMS) to markets in Brazil exclusively.

As part of the agreement, VisioLogix also integrates Powerconn's diverse product lines of body-worn cameras, in-car videos, license plate, and facial recognition systems with Hydra solutions allowing Powerconn to provide secure digital evidence management Cloud and hybrid services to multiple law enforcement and security firms in Brazil.

"Powerconn OEM license agreement allows us to expand into the international market. Our DEMS solution, Hydra and HydraSOS, diversity deployment options (On-Premise or Cloud), allows us to continue to expand our market. With Powerconn and other distribution agreements, we will continue to expand our international market further." – Chi Nguyen, VisioLogix's CEO.

"With the VisioLogix solutions, Powerconn will be able to enter new markets with better customer acquisition as well providing upgrades and migration paths to existing customers. The VisioLogix Hydra DEMS was the clear winner in our multiple vendor evaluations. Hydra and Hydra-SOS allow us to deploy solutions to small and large agencies, which usually take up to 60 days and is now down to 5 days - a HUGE saving for us." – Paul Pollicastro, Powerconn President and Managing Director.
