When used in a virtualized environment, content protected by digital rights management technology, Microsoft® BitLocker or any full volume disk drive encryption technology may not be as secure as protected content not in a virtualized environment. You should comply with all domestic and international laws that apply to such protected content.

Unless applicable law gives you more rights despite this limitation, you may use the software only as expressly permitted in this agreement. In doing so, you must comply with any technical limitations in the software that only allow you to use it in certain ways. You may not
  - a. work around any technical limitations in the software;

A license for the SOFTWARE PRODUCT may not be shared or used concurrently on different devices.
5. DESCRIPTION OF OTHER RIGHTS AND LIMITATIONS.
- a. Limitations on Reverse Engineering, Decompilation, and Disassembly. This EULA is your proof of license to exercise the rights granted herein and must be retained by you.   - e. Termination. Without prejudice to any other rights, VISOLOGIX may terminate this EULA if you fail to comply with the terms and conditions of this EULA. In such event, you must destroy all copies of the SOFTWARE PRODUCT and all of its component parts.
6. Activation associates the use of the software with a specific device. During activation, the software will send information about the software and the device to VisioLogix. This information includes the version, language and product key of the software, the Internet protocol address of the device, and information derived from the hardware configuration of

the device. By using the software, you consent to the transmission of this information. If properly licensed, you have the right to use the version of the software installed during the installation process up to the time permitted for activation. Some changes to your device components or the software may require you to reactivate the software. The software will remind you to activate it until you do.

- a. Validation verifies that the software has been activated and is properly licensed. It also verifies that no unauthorized changes have been made to the validation, licensing, or activation functions of the software. Validation may also check for certain malicious or unauthorized software related to such unauthorized changes. A validation check confirming that you are properly licensed permits you to continue to use the software, certain features of the software or to obtain additional benefits. You are not permitted to circumvent validation. This is to prevent unlicensed use of the software.
- b. The software will from time to time perform a validation check of the software. The check may be initiated by the software or VisioLogix. The updates or downloads are required for the proper functioning of the software and may be downloaded and installed without further notice to you. During or after a validation check, the software may send information about the software, the device and the results of the validation check to VisioLogix. This information includes, for example, the version and product key of the software, any unauthorized changes made to the validation, licensing or activation functions of the software, any related malicious or unauthorized software found and the Internet protocol address of the device. VisioLogix does not use the information to identify or contact you. By using the software, you consent to the transmission of this information.
- c. If, after a validation check, the software is found to be counterfeit, improperly licensed, or include unauthorized changes, the functionality and experience of using the software will be affected, for example:  
VisioLogix may
  - i. Repair the software, remove, quarantine or disable any unauthorized changes that may interfere with the proper use of the software, including

- circumvention of the activation or validation functions of the software, or
- ii. Check and remove malicious or unauthorized software known to be related to such unauthorized changes, or
